NUVAL WARS!
Choose This, Not That

March is National Nutrition Month! An easy way to improve your nutrition is simply by using the “ChooseMyPlate” icon shown above. Using a 9-in plate, fill half of your plate with fruits and vegetables, a quarter of your plate with lean protein, and the remaining quarter with whole grains. Add a side of low-fat dairy (such as low-fat milk, cheese, yogurt) and you’re all set!

20-Minute Chicken Creole

Leg Exercise: Stationary Lunge

Muscles Worked: The stationary lunge works all the major muscles of the lower body: the quadriceps, hamstrings and glutes.

Description: Start in good alignment: Stand up straight with ear over shoulder, over knee, over hip. Next, position yourself in a split stance by placing one foot in front of the body and the other foot behind (pic 1). This creates a supportive base. Lower yourself straight down, while keeping your front knee over your toe (pic 2). Press back up to starting position. Do 8-10 repetitions on each leg. Rest and repeat sequence 1-2 more times. *Beginner?—hold on to the back of a sturdy chair. Advanced?—hold dumbbells in your hands as you lower and raise.*

**We recommend prior consent from your physician before starting any exercise program*
